Product Operations & Growth — Consumer AI Products

cara.liquanqiu@gmail.com · [phone] · linkedin.com/in/[handle] · [City, Country] · Open to relocation & visa sponsorship

SUMMARY

Product-operations and growth operator who has taken **multiple consumer AI products from 0-to-1** across the US, Latin America, and other Tier-1 markets. I build the operating systems — launch readiness, feedback loops, issue triage, and model/skill-performance tracking — that let small, AI-native teams ship with confidence, and I operate fluently across Research, Product, Engineering, and GTM. Heavy hands-on user of Claude Code and internal agent tooling to turn manual workflows into automated pipelines.

EXPERIENCE

Growth Operations Lead · PawLogic

Sep 2025 – Present

Early-stage consumer AI startup — launched an AI agent-community product and AI media products into overseas markets (consultant → full-time).

- Owned **launch readiness** for a new AI agent-community product: ran pre-launch coordination across owned channels, mega/mid-tail creators, and PR, driving an estimated **tens of millions of impressions**; hit **1,000+ DAU within 2 weeks** and **30% Day-0 retention**, on track to 100K DAU.
- Built the **0-to-1 seed-user and feedback loop** end-to-end (Reddit research → posting → reply → paid → Discord DMs), landing the first 50 users and a Meta test matrix that reached **\$3 US CPI** and **30% Day-1 retention**.
- Stood up an **issue-triage system from scratch**: defined a tiered support SOP and partnered with engineering to automate monitoring → triage → resolution, closing the customer-issue loop without manual routing.
- Built an **automated marketing pipeline in Claude Code** (competitor-insight mining → positioning → creative production → landing-page generation → performance review), replacing a fragmented multi-tool workflow.
- Prior product (Drama.Land, AI music-video agent): owned growth end-to-end to **\$1M ARR in 4 months** — ran onboarding → paid A/B tests across bucketed landing pages, tuned model/skill performance by user scenario, and set subscription/credit pricing off gross-margin analysis.

Operations Lead, New Products & Overseas Strategy · Meitu Inc.

Jun 2023 – May 2026

Publicly-listed consumer imaging & AI company (HKEX: 1357). 30% global strategy (reporting to CPO) · 70% new-product operations, carrying revenue targets.

- Ran **operations and overseas GTM** for two AI products — RoboNeo (AI video agent) and MVLAND (AI music) — carrying individual revenue targets and standing up a **~4-person AI-native pod per product** as the operating model for fast decisions.
- Drove **launch and integrated marketing** across paid (Google, Meta), creators, community (X, LinkedIn, TikTok, Discord), and SEO; RoboNeo hit **#1 in its iOS category in 10+ countries** and #1 overall in Brazil.
- Built a **feedback loop from consumer users into the roadmap** — synthesized user research and support signal into shipped features and validated their traffic/monetization impact; MVLAND became the division's fastest-growing product (~\$500K ARR at departure).
- Built the company-level "imaging market map" — an **automated monitoring system** tracking share, user scenarios, and competitors across design/video/photo surfaces (app + web), informing new-bet decisions for **6 business units**; delivered GTM and product strategy for four units and M&A diligence/post-merger integration (e.g., ZCOOL).

Product Manager, AI Creative-Asset System · Meitu (concurrent side project)

Dec 2025 – May 2026

Led an AI system that deconstructs and reassembles high-performing ad videos, to keep overseas paid-media teams ahead of creative fatigue.

- Defined a **dual-mode architecture** (fixed workflow + agent-driven node canvas) and a multi-model strategy (Gemini + Seedance) after auditing 10+ AIGC tools; designed a three-layer agent loop (scheduler → executor → LLM decision points) with **gate approvals, A/B branch compare, and editable nodes**.
- Owned **quality operations** in place of formal evals: built a **QA checklist (18 checkpoints across 5 categories)** and a human-in-the-loop test system, iterating on bad cases — e.g., collapsed serial multi-entity calls into one

matrixed pass, cutting latency from **10 min to 40 sec**.

- Shipped a working prototype (FastAPI / Next.js / React 19) that **freed ~40% of headcount** and lifted output to **60 creatives/week**.

Senior Strategy Manager · ByteDance

Dec 2020 – Jun 2023

Business/operating analysis for ad monetization & moderation; AI product innovation for platform trust & safety.

- Built and led a **5-person analytics team** for ad-revenue and content-moderation operations, focused on lifting revenue and review efficiency.
- Led AI-product innovation for a **TikTok mental-health care program** — detection, early warning, intervention, and referral for at-risk users — reaching **100K+ users** and reducing high-risk incident exposure.

EARLIER EXPERIENCE

- **New Oriental** — Business Analytics Lead, K-12 online education (2019–2020): built the 0-to-1 operating-analytics stack across three org tiers; **+20% market share, +10% paid conversion**.
- **Alibaba (Ele.me)** — Business Analysis Manager (2019): national merchant-side strategy — market penetration, budget allocation, and SMB/KA acquisition playbooks.
- **Didi** — Regional Operations Manager, Melbourne / Tokyo / Latin America (2017–2018): built the overseas customer-service system and drove driver-side supply to **30% penetration** in the Australia launch.
- **Accenture** — Senior Business Analyst (2013–2016): digital-transformation strategy and system implementation for large state-owned enterprises.

SELECTED SIDE PROJECT

- **LocalAd Studio** — solo-built agent for US blue-collar / home-services local ads (plumbing, HVAC, cleaning, moving). Deconstructs winning local ads → swaps slots (city/service/season) → storyboard/copy → rendered output, via a four-layer semantic architecture + 15 meta-prompt templates on Claude Code / FastAPI / Next.js. Lifted creative output from **8/day to hourly batches (~80% less manual effort)**. (2026)

SKILLS

Product Operations: launch readiness · operating cadence · feedback-loop & issue-triage systems · cross-functional program management · experimentation (A/B) · model/skill-performance operations

Growth & GTM: 0-to-1 market entry · paid media (Meta / TikTok / Google Search & PMax) · creator & affiliate (CPS) programs · SEO & owned channels · community (Reddit / Discord) · retention & monetization

AI & Tooling: Claude Code · OpenClaw · agent-product operations · workflow automation · ML user segmentation (random forest) · FastAPI / Next.js prototyping

Languages: Mandarin (native) · English (fluent, working proficiency) · Spanish (learning)

EDUCATION

University of Melbourne — M.S., Information Systems (minor: Finance)

2010–2012

Huazhong University of Science & Technology — B.E., Electronic & Information Engineering

2006–2010
