AI Applications & Consumer Product Growth — Global Expansion · 0-to-1

cara.liquanqiu@gmail.com · Open to relocation & visa sponsorship

SUMMARY

Growth and product operator with 0-to-1 market-entry experience across Tier-1 and Latin American markets. Strong at product definition and brand narrative, and at orchestrating the full channel stack — PR, organic (SEO, owned-account matrices, creator partnerships), paid (Meta / TikTok, Google Search & PMax), and affiliate (CPS) — to hit growth targets. An AI-native operator: I use Claude Code / OpenClaw to build automated marketing pipelines (competitor-insight mining → ad-angle extraction → creative production → landing-page generation → performance review), and I design and prototype AI products myself — a viral-video deconstruction-and-rebuild system (part-time PM at Meitu) and an independent side project, a local-marketing creative agent for US blue-collar services.

EXPERIENCE

Growth Operations Lead · PawLogic

Sep 2025 – Present

Early-stage consumer AI startup; multiple products, 0-to-1 entry into Tier-1 markets (consultant → full-time).

New incubated product (in confidentiality period) — AI agent-community app: product definition, overseas brand narrative, user growth & retention

- **Launch marketing:** owned overseas pre-launch since the June debut — coordinated multi-platform owned accounts, mega + mid/long-tail creators, and PR to an estimated **tens of millions of impressions**.
- **Product validation:** ran seed-user discovery (Reddit research → posting → replies → paid → Discord DMs) to land the first 50 users; built a Meta creative-test matrix, reaching **\$3 US CPI and 30% Day-1 retention**.
- **UGC flywheel:** combined owned-account matrix + UGC partnerships with post boosting and re-cuts to drive creator seeding and referral loops, consolidating users into a Discord community as a brand asset.
- **Results: 1,000+ DAU within 2 weeks** of pre-launch at 30% Day-0 retention; on track to 100K DAU.

Drama.Land (AI music video) — Market Lead: ads, creators, SEO, owned community, user feedback & product ops

- **Product definition:** via Reddit research and competitive analysis, defined target audiences, per-segment selling points, channels, and creative formats, and set acquisition-channel budget allocation.
- **Paid media:** with vendors, built strategy, creative testing, and performance review across **Google (Search, PMax) and Meta / TikTok** — reaching **Google ROAS >0.3 and Meta ROAS ~0.8**.
- **Creator programs:** built a 0-to-1 creator system (CPS / affiliate); used long-tail KOC partnerships + re-cut paid amplification to model blended ROAS and identify which creator × angle to scale (exposure → private-link distribution → download attribution).
- **Model / skill tuning:** reverse-engineered high-value music sub-styles from user scenarios and led skill tuning; set subscription/credit monetization off gross-margin analysis, lifting new-version margin.
- **Product ops:** ran onboarding → paid-conversion A/B tests across bucketed traffic and landing pages to find the best per-scenario conversion triggers.
- **Results: \$1M ARR in 4 months**, a stable creative playbook, and 5 custom monthly-service clients in the pipeline.

Operations infrastructure

- Built an **automated marketing pipeline in Claude Code / OpenClaw** (competitor insight → ad-angle → creative → landing page → performance review).
- Stood up an **automated customer-issue loop** — tiered SOP + engineering integration for monitoring → triage → resolution.

Operations Lead, New Ventures · Meitu Inc.

Jun 2023 – May 2026

Publicly-listed consumer imaging & AI company (HKEX: 1357). 30% global strategy · 70% new-product operations, carrying revenue targets.

Strategy (reporting to CPO)

- Supported overseas strategy and planning: delivered a **company-level "imaging market map"** — automated monitoring of market size, share, user scenarios, and habits by country and competitor across design/video/photo (app + web), feeding new-opportunity support to **6 business units**.
- Delivered product strategy and GTM for Meitu's flagship, new-camera, innovation-unit, and open-platform lines; ran diligence, post-merger integration, and synergy strategy for investments/M&A (e.g., ZCOOL).

Operations Lead + revenue target + overseas growth

- **2024:** owned positioning and selling points for Vmake, reaching **~\$500K ARR in one year** via organic channels (creators, affiliates, owned accounts), and turned first-line user research into shipped, traffic-validated features.
- **2025:** ran operations and integrated overseas marketing for RoboNeo (AI video agent) and MVLAND (AI music), carrying revenue targets and building a **~4-person AI-native pod per product**; work spanned product definition, paid media (Google, Meta), creator programs, community, SEO, and EDM.
- **Results:** RoboNeo reached **#1 in its iOS category in 10+ countries** and #1 overall in Brazil; MVLAND became the innovation division's fastest-growing product (~\$500K ARR at departure).

Product Manager, AI Creative-Asset System · Meitu (part-time side project)

Dec 2025 – May 2026

Built an AI system to deconstruct and rebuild high-performing videos, so overseas paid-media teams could respond to the market faster (manual production ran ~2 hrs/asset against a 3-day refresh cadence).

- **Product design:** defined the path (deconstruct → slot-swap → storyboard edit → render) and a dual-mode architecture (fixed workflow + agent-driven node canvas) after auditing 10+ AIGC tools; chose a Gemini + Seedance multi-model strategy.
- **Architecture:** designed a four-layer semantic model (theme / narrative / shot / execution) with identity anchors and asset slots for shot consistency and local replacement, plus a three-layer agent loop (scheduler → node executor → LLM decision points) with gate approvals, A/B branch compare, and editable nodes; built 15+ meta-prompt templates.
- **Delivery & QA:** shipped a prototype (FastAPI / Next.js / React 19) with an **18-point QA checklist (5 categories)**; iterating on bad cases cut multi-entity analysis latency from **10 min to 40 sec**.
- **Impact:** freed **~40% of headcount** and lifted output to **60 creatives/week**.

Senior Strategy Manager · ByteDance

Dec 2020 – Jun 2023

Business analysis · foundation project sourcing & investment management.

- **Business analysis:** built a 5-person team for ad-monetization and moderation analytics, focused on lifting ad revenue and review efficiency.
- **CSR initiative:** led AI-product innovation for a TikTok mental-health care program — detection, early warning, intervention, and referral for at-risk users — reaching **100K+ users** and lowering high-risk incident exposure.
- **Foundation:** managed an executive philanthropic fund; sourced and managed AI health/safety and frontier-medicine projects, landing 3 education projects and 1 medical industry-academia collaboration.

EARLIER EXPERIENCE

- **New Oriental** — Business Analytics Lead, K-12 online education (2019–2020): built the 0-to-1 operating-analytics stack across three org tiers and student/teacher segmentation models; **+20% market share, +10% paid conversion**. (Left due to the "double-reduction" policy.)
- **Alibaba (Ele.me)** — Business Analysis Manager (2019): national merchant-side strategy — penetration, budget allocation, and SMB/KA acquisition playbooks; optimized merchant display for off-peak conversion.
- **Didi** — Regional Operations Manager, Melbourne / Tokyo / Latin America (2017–2018): built the overseas customer-service system (LatAm/Australia/Brazil vendor sourcing, VOC) and drove driver-side supply to **30% penetration** in the Australia launch.
- **Accenture** — Senior Business Analyst (2013–2016): digital-transformation strategy and WMS/sales-system implementation for large state-owned enterprises (China Resources, China Post).

SELECTED SIDE PROJECT

- **LocalAd Studio** — solo-built creative agent for US blue-collar / home services (plumbing, HVAC, cleaning, moving): deconstruct winning local ads → swap slots (city / service / season) → storyboard & copy → rendered output, via a four-layer semantic architecture, identity anchors/asset slots, multi-stage orchestration (gate approvals, A/B variants, editable nodes), and 15+ meta-prompt templates on Claude Code / FastAPI / Next.js. Lifted output from **8/day to hourly batches (~80% less manual effort)**. (2026)

SKILLS & LANGUAGES

Core: integrated overseas marketing (IMC) · brand narrative & PR · creator/KOL & affiliate (CPS) programs (0-to-1) · social matrix & community (Reddit / Discord) · performance marketing · data-driven decisioning · cross-functional & cross-border team leadership

AI & Tools: Claude Code · OpenClaw · workflow automation · AI agent-product operations · ML user segmentation (random forest) · FastAPI / Next.js prototyping

Languages: Mandarin (native) · English (fluent, working proficiency) · Spanish (learning)

EDUCATION

University of Melbourne — M.S., Information Systems (minor: Finance)	2010–2012
Huazhong University of Science & Technology — B.E., Electronic & Information Engineering	2006–2010
