

Subject: You said you hire ahead of the job description — here's a growth idea early

Hi Ambi team,

Your careers page says you'd rather hear a good idea early than wait for the right opening to exist. So here it is: **Ambi will need its growth loop built the way you build your product — around trust and daily habit, not ad spend.** A personal intelligence that "walks with you through life" is a high-intimacy purchase; the products that win this category get seeded in communities, spread by creators, and retained by emotional connection. That happens to be exactly the work I do.

Right now I'm the first growth hire at an early-stage consumer AI startup, running an AI companion-community product from zero: seeded the first users through Reddit and Discord, and reached **\$1M+ ARR and 20K+ DAU within two months of launch, with Day-1 retention above 30%**. Before that: an AI music-video product to **\$1M ARR in four months**, and at Meitu (HKEX-listed), an AI video app to **#1 on the iOS charts in 10+ countries** — driven by creators, UGC, and community rather than paid volume. I've built creator programs from scratch (recruitment, CPS incentives, user-to-creator conversion) and run growth for emotionally sensitive products, including a TikTok mental-wellbeing program at ByteDance that reached 100K+ users.

One more thing, because your values page says "we are an AI company, not just a company that makes AI products": that's also how I work. I build my own growth infrastructure with Claude Code — competitor-insight-to-creative pipelines, automated attribution — and I've shipped two AI products solo, including Actionway (actionway.ai), a 52-capability creative API for AI agents. I don't just market AI; I live in it.

If Ambi is thinking about its first dedicated growth role — positioning, community seeding, creator flywheel, and measurement for the launch (and the hardware next year) — I'd love to own it end to end. My product-by-product resume is attached; happy to share a concrete 90-day cold-start plan for Ambi if useful.

Best,

Cara

Ambi 团队你们好，

你们的招聘页写着“宁愿早点听到一个好想法，也不想等对的岗位出现”。那我就直接说：**Ambi 的增长体系需要按你们做产品的方式来搭——围绕信任与日常习惯，而不是靠投放堆量。**一个“陪你走过生活”的个人智能是高亲密度的选择，这个品类里赢的产品都是从社区种下、靠创作者扩散、靠情感连接留住的。而这恰好就是我每天在做的事。

我目前是一家早期消费 AI 创业公司的第一位增长负责人，从零操盘一款 AI 陪伴社区产品：从 Reddit 和 Discord 种下第一批用户，**上线两个月 ARR 过百万美金、DAU 超 2 万，Day1 留存超 30%**。在此之前：一款 AI 音乐视频产品 4 个月做到 ARR \$100 万；在美国图（港股上市）操盘的 AI 视频产品拿下 10+ 国 iOS 榜首——主引擎是创作者、UGC 与社区，而非买量。我从零搭过创作者体系（招募、CPS 激励、用户转创作者），也做过情绪敏感型产品的增长，包括在字节主导触达 10 万+ 用户的 TikTok 心理关怀项目。

还有一点，你们价值观里写“我们是一家 AI 公司，不只是做 AI 产品的公司”——我也是这么工作的：用 Claude Code 搭自己的增长基建（竞品洞察到素材的自动化管线、无像素归因），还独立开发了两款 AI 产品，包括 Actionway（actionway.ai，面向 AI Agent 的 52 项创意能力 API）。我不只是营销 AI，我活在 AI 里。

如果 Ambi 在考虑第一个专职增长角色——发布期的定位、社区种子、创作者飞轮与度量（以及明年的硬件）——我希望端到端把它接下来。产品维度的简历随信附上；需要的话，我可以给 Ambi 写一份具体的 90 天冷启动方案。
